BRADLEY

UNIVERSITY

August 18, 2008

Dear Campus Community,

There is great concern in the academic community about the credibility of research. fabricated data related to stem cells, falsified data on bubble fusion, use of Photoshop to enhance images, fabricated clinical results in a cancer study, plagiarized doctoral dissertations and masters theses, and on and on. These are not events of the past but of today, some as recent as last month. All have negative effects on the perception of the reliability and effectiveness of science, and in some cases can impact the welfare of society.

The increase in the instances of irresponsible conduct has led NIH and NSF to require RCR training of all researchers involved in funded projects, and it is likely that other federal agencies will follow soon. The Council of Graduate Schools (www.cgsnet.org) and the Office of Research Integrity (<http://ori.dhhs.gov>) provide resources for education in RCR. With funding from an NSF grant from the Council of Graduate Schools, the Responsible Conduct of Research Task Force has been organized at Bradley University.

This task force has selected a collection of books, DVDs, videos, and web sites that address many facets of ethical research, including business ethics, engineering ethics, ethics across the curriculum, and research ethics. This collection, which is available at the Cullom-Davis Library, provides a resource for use by faculty and students in teaching and learning about research ethics and the responsible conduct of research.

Results of a survey among 23,000 undergraduates, and 9,000 faculty, administrators, and professionals at 23 colleges and universities released in April 2008 by the Association of American Colleges and Universities clearly show that we can and must do more to educate students about ethics, personal and academic integrity, professional responsibility, and respect for diverse perspectives. A summary of the survey results was published in the *Chronicle of Higher Education* on May 2, 2008.

As we begin a new academic year and continue to work together to enrich lives and communities through teaching, research, and service, I trust that you will find appropriate resources to help us collaborate together to build an exemplary ethical environment at Bradley.

Warm regards,

Robert I. Bolla
Interim Provost and Vice President for Academic Affairs

Business Ethics

Ash, Eve & Quarry, Peter. [DVD] (2007). *An introduction to business ethics*. New York: Insight Media.
